

CATALOGUE 2018 / 2019

CSW
LANDSCAPING
Dutch Quality FlowerBulbs

Dear Customer,

We are pleased to present our completely renewed autumn 2018 catalogue. CSW Landscaping is meeting a growing demand for a wide range of flower bulbs specially selected for landscapers, gardeners, municipalities and large-scale users of flower bulbs. In addition to the completely redesigned catalogue, the range has also been updated and expanded to better meet your wishes. Special attention has been paid to our range of specialty bulbs. In recent years we have seen a growing interest in this group of bulbs because of their countless uses.

In addition to the individual species we offer, we shall also have a very wide range of mixes for different uses. Whether you want a colourful border with long tulips or a mix that will provide colour early on year after year, it's all possible! Should you have any questions about our products and their uses, the CSW Landscaping team will be happy to assist you.

We package our products in handy, usable units that give you the flexibility to let your creativity run wild. You can find the number of bulbs per package on our price list. We have compiled the list with the greatest possible care based on the smallest packaging unit. However, if you need larger quantities, we would be happy to put together a tailor-made offer for you.

As well as the above advantages of buying flower bulbs from CSW Landscaping, you can also count on us for excellent quality flower bulbs and proper delivery. To simplify and speed up the ordering process, you can also order your flower bulbs online through our online store:

www.cswlandscaping.com.

We hope that you will enjoy browsing through our catalogue and look forward to welcoming you (again) as a customer this autumn!

Darwin Hybrid Tulips

Darwin Hybrid Tulips are all single-flowered cultivars with long-lasting flowers on strong stems. This type of tulip is very suitable for mass planting in a landscape setting or, with its height of 50-60 cm excellent as a cut flower. When planted at a depth of at least 15 cm, this group of tulips is performing well for several years. Mid-season flowering.

Double Early Tulips

Double Early Tulips are hybrids of Single Early Tulips. Tulips are regarded double when they have more than six petals. Double Early Tulips are the first double flowering tulips to flower and have peony like flowers on short sturdy stems and are suitable for borders, mass planting or pots.

Lily Flowering Tulips

This group of tulips is named for the shape of their blooms, which resemble old species tulips from Turkey. Their long, pointed petals arch outward and, when fully open, look like a six-point star. Most varieties are blooming late in the season and grow up to 50-60 cm and are not as sturdy as most other tulips. However their grace and elegance easily compensate this.

Fringed Tulips

Fringed Tulips, also known as Crispa Tulips, are sports of Single Late Tulips. Accordingly, they are flowering late in the season. The edges of the petals are fringed, appearing to be frayed. The blooms are especially long-lasting. These elegant tulips are becoming more popular every year!

Kaufmanniana Tulips

Kaufmanniana Tulips are, with some exceptions, generally low growing which make them ideal for rock gardens and containers. The flowers have pointed petals which open almost completely flat on sunny days. This type of tulip is also called waterlily tulip as a fully opened flower looks like a waterlily. The leaves are often striped or mottled. Early flowering and very suitable for naturalising.

The First

A close-up photograph of several tulips with pink and yellow variegated petals. The flowers are in various stages of bloom, with some showing the full shape of the petals and others partially open. The background is a soft, out-of-focus green, suggesting foliage. A white curved shape on the right side of the image contains the title and description text.

Fosteriana Tulips

This group of tulips is also known as Emperor Tulips. These tulips have been bred from Tulipa Fosteriana which grows in Central Asia. Fosteriana Tulips vary somewhat in height but they all produce large flowers in bright colours on strong stems. These tulips are very long-lasting and ideal for naturalising.

Greigii Tulips

Greigii Tulips originated from *Tulipa greigii* species which are native to Kazakhstan. Greigii Tulips have large flowers compared to the plants as a whole. The flowers come in very bright colours often with two-toned petals and open wide in full sun. Greigii Tulips are ideal for rock gardens and pots as they are very short. The distinctive foliage is mottled with maroon stripes.

A close-up photograph of several Parrot Tulips. The flowers are characterized by their large, deeply fringed, and curled petals, which are a vibrant red color with white variegation. The background is a soft, out-of-focus green, suggesting foliage. The image is split by a diagonal white line that separates the text area from the main image.

Parrot Tulips

These tulips were developed from mutations of certain late flowering and Triumph Tulips. The flowers are large and have deeply feathered, curled or twisted brightly coloured petals. Parrot Tulips are somewhat sensitive to cold and wet weather so they require a somewhat protected spot. Flowering season is mid to late. They make excellent cut flowers.

Ronald van Loon

Bulbs in public green spaces

We have seen a growing interest over the years in the use of flower bulbs in public green spaces. Flower bulbs bring us the first colours after winter and provide that spring feeling so many people long for after the cold, dark months.

‘These mixes can be composed of species that bloom almost simultaneously to create a spectacular display’

In fact, no other type of planting gives splendour to beds, parks, verges and lawns in spring with such a diverse array of colours and shapes. In addition to bringing colour, variety and cheerfulness, flower bulbs also play an increasingly important role in encouraging biodiversity. By using the right species, they can provide food for butterflies and bees. The flowering period of bulbs can play a crucial role here, given there are hardly any other crops that are a source of food for these insects that early in the year.

Our aim at CSW Landscaping is to respond in various ways to the growing demand for flower bulbs for use in public green spaces. This starts with the composition of our range. While we have a wide selection of tulips and daffodils, CSW Landscaping also spends a lot of time and care selecting our range of special bulbs and tubers. Many species in this group are highly suitable for use in public green spaces because of their ability to flower for several years in a row and the possibility to plant them mechanically.

Our product range includes individual species for use in public green spaces as well as various mixes. These mixes can be composed of species that bloom almost simultaneously to create a spectacular display or can also be used to lengthen the flowering period. A carefully selected mix makes it possible to achieve a flowering period of between 8 and 10 weeks.

To support our customers in implementing their planting plan, CSW Landscaping offers the possibility of having the bulbs planted mechanically (under grass) and can offer advice about our product range. CSW Landscaping has its own planting machine and, just as important, people with the right expertise to make every planting plan a success. Contact one of our employees, free of obligation, for advice about the best plan for you.

About Ronald

Ronald was born and raised in the heart of the bulb region and was infected early on with the 'bulb virus'. With more than 25 years of experience in bulbs, he has built up a wealth of knowledge and expertise. In recent years, he has seen the use of flower bulbs change dramatically: "In the past, we used to see mainly groups of flower bulbs of one species, but nowadays we see a much more creative use with many combinations of different bulbous flowers." Ronald will be happy to help you with all your questions on composition and use of flower bulb mixes.

Large Cupped Narcissus

Large Cupped Narcissus is the group you see most often in gardens. Large Cupped Narcissus have a cup which is more than one third but less than equal to in length than the petals. This group of Narcissus come in a wide range of colours and in a wide variety of cup shapes. Its flowers are extremely weather-tolerant and are suitable for every possible use: in beds, in borders, as a cut flower and for indoor forcing. Also suitable for naturalising.

Split Corona and Papillon Narcissus

Varieties in this division have a very different flower form compared to the usual flower form. The term split corona refers to the cup which is split for at least 50% of its length. This makes that these varieties have open, upfacing flowers often resembling a hibiscus. Split Corona Narcissus varieties are suitable for mass planting and as cut flower. Most varieties flower mid-spring.

Apricot Whirl

Banana Splash

Cassata

Parisienne

Trepolo

Tripartite

Congress

Cyclamineus Narcissus

This division of Narcissus has straight slender trumpets and reflexed petals. The reason why this division is called cyclamineus is that several varieties from this group strongly resemble a cyclamen. Cyclamineus Narcissus is one of the first groups to flower in spring. As most varieties from this group are rather small they are performing better when planted close together or in front of the border. They are also excellent for rock gardens and indoor forcing.

Cotinga

Peeping Tom

Rapture

Tête-à-Tête

Toto

Wisley

Jonquilla Narcissus

This division of Narcissus is known as the most fragrant division. The flowers come in a wide range of colours and have flat or slightly reflexed petals and a wide cup. The flower stems normally bear 2-6 flowers resulting in a long flowering period. They naturalise very well and flower mostly late in the season.

This group comprises several species which originate in the wild and are now widely cultivated. These daffodils are very suitable for naturalising.

lobularis

obvallaris

Poeticus Narcissus

This type of daffodil is also known as the 'poet's daffodil'. All species in this group have large white petals and a small corona in contrasting colours, often red and yellow, and are excellent for naturalisation. They have a lovely fragrance and, due to their late flowering, can be easily combined with Single Late Tulips.

75

Actaea

poeticus var. Recurvus

Triandrus Narcissus

This group is known for its very colourful and long flowering period, not least because each stem contains more than one blossom. The somewhat pendant, nodding flowers have slightly reflexed petals. Most species from this group have a wonderful fragrance. These plants are suitable for use in pots and are known to be a superb naturalising daffodil when planted in a slightly shaded spot. The flowering period is from mid-April until well into May.

About Ton

Ton has been working in the flower bulb sector for several years as a representative in Scandinavia as well as providing behind-the-scenes administrative support. He has been involved with CSW Landscaping since its inception in 2017, restructuring the company's processes in response to changing objectives and customer needs. This has included improving ordering procedures to make them more convenient and ensuring punctual delivery times.

He has assisted in introducing a solid assortment, and the expansion of the assortment in 2018, based on customer feedback. The aim is to include more customers in the project, to listen to their needs when it comes to quality and delivery, and to adapt and roll out the programme accordingly in the upcoming years.

CSW Landscaping aims to offer a robust product range for both offline and online markets at competitive prices and with excellent delivery conditions. We focus on ensuring customers' specific wishes are met without creating unnecessary complications. Ton will not only gladly assist you with your order but is always happy to inform you about the possibilities of online ordering.

Mixtures

Mixture From Dusk till Dawn

Ronald's Tips

Why plant mixed bulbs?

With a carefully composed bulb mix, you can considerably extend the flowering period of your planted bulbs. A relatively simple mix allows you to extend the flowering period by a few weeks. For more complex mixes, it is even possible to achieve a flowering period of two to three months. These mixes start in March with early-flowering bulbs like Crocus and Puschkinia and end in May with Allium and Camassia.

Various mixes are ideal for multi-year flowering. You plant the mix once and have years of enjoyment from your flowers with minimal maintenance. We shall be happy to advise you on which mixes are best suited to achieve many years of flowering.

Planting mixes under grass ensures colourful and dazzling verges in the spring. With our special machine for planting bulbs under grass, we can transform each verge into a sea of flowers. And using the right mixes in combination with a suitable mowing plan will ensure that you can enjoy the splendour of early bloomers year after year.

Flower bulb mixes contribute to biodiversity! Early-flowering bulbs like Chionodoxa, Fritillaria and Narcissus are often the first source of nectar after winter. This early nectar is crucial as a food supply for bees and butterflies in the spring.

Aside from mixes providing colour during a long period of time in the year when few other plants are in flower, there are also economic and social benefits. Several studies have shown that people are happier and healthier in a green environment. The early flowering period of bulb mixes means they create an excellent transition from a winter gardenscape and trees and shrubs that are still bare.

Early Bird

A colourful mixture of *Crocus chrysanthus* for an early spring feeling. This mixture flowers before the larger *Crocus vernus*.

Jesperhus Mix

Gentle coloured from the Danish Jesperhus Blomsterpark. The white en purple colours softened by the creamy yellow brightens up the park every year.

Blue Grass

Mixture of only white, blue and striped *Crocus vernus*.

Colour Carnival

The classic Crocus vernus mixture with all colours. Like all crocus mixtures ideal for naturalising in grass.

Dancefair

A cheerful mix of elegant lily flowering tulips in several heights. The combination of bold and more soft tone colours brings royalty to every garden.

Silkeborg Mix

Mixture of 8 hardy varieties starting yellow and ending in white colours. Performs well in colder climates.

Tiny Bubbles

A good mixture for early colour. This mix includes Chionodoxa, small Tulips, Muscari, Galanthus and Crocus. Good for naturalising in an informal landscape.

Dynasty of Emperors

A Dynasty formed by the well-known Emperor Tulips in all its bright colours. These Fosteriana tulips are well known for their ability to return 2 or 3 years.

Garden Party

A mixture of the complete Van Eijk family. Each family member has the same strong characteristics: big, bowl-shaped flowers and a strong performance for 2-3 years.

Cool Waters

Subtle mix of cool blue Muscari and daffodils that slowly mature to completely white, like sails on an ocean.

Pink Champaign

An exciting mix of 2 peony like flowering tulips. The many petaled flowers give this mix a luxurious look.

May Romance

This mixture does exactly what its name says: creating romance in the wedding month of May.

Spring Cocktail

 25- 3-4-5 70
 55

The yellow and white flowering varieties brighten up every garden display and the soft pink tones give a little tropical touch to this mixture.

Babyshower

 35 4 75

A nice mix of a bright pink tulip and a sweet fragrant Narcissus.

Purple Rain

 55 3-4 70

The different shades and shapes of purple in this mix prove to be a good companion of the softer yellows. Surprising contrast with a great effect.

Murillo Mix

This mix is a true explosion of colours. Nice, short tulips with strong stems. Excellent for pots.

Smokey Mountains

The different shades of purple resemble The Smokey Mountains described by the native Indians as Mountains of the Blue Smoke.

Melange Paris

A mixture of long stemmed, late flowering tulips. Excellent for mass planting.

Lilac Morning

 30- 4-5 70
 50

A mix of different shades of pink, purple and lilac. The difference in height creates a multilevel show.

Little Rascals

 15- 4-5 150
 25

Surprising what some little varieties can do. This mix of low growing varieties can easily compete with its taller competitors when it comes to brightening a garden.

Bowl of Plenty

 45 4 50

Mix of tulips with many petaled bowl shaped flowers. You will be amazed by the abundance of colour when this mix is in full bloom.

Lady Marmalade

A rich mixture of numerous varieties with a colouring from soft peach tones to bold orange. From low growing varieties to really tall ones. This mix has everything! Extremely long flowering period. The crown imperial give this mix an extra dimension.

Joy of Spring

This blend has been developed in the spirit of the historical Tulip Insulinde. This blend contains more than 30 varieties. It includes early bloomers like Crocus and Iris. For the late season there will be Tulips, Alliums and Camassia. These varieties make up a soft Scandinavian spring theme.

Spring Sunset

The theme of this mix is “burnt colours” and includes orange, violet and yellow coloured flowers. You will find 30 varieties in this mix. Starting with crocus and ending with late tulips and alliums.

From Dusk till Dawn

10- 4-5
90

A mixture of bright coloured tulips topped off with tall fritillarias which resembles sunrise en sunset in one mix.

Summer Breeze

55- 4-5
60

Mixture of pastel coloured Darwin Hybrid Tulips. With its impressive flowers, this mix gives a robust look to every garden display.

Prince of Love

35 4 70

Mixture of tulips from the well-known "Prince" tulips. In this mix they prove to be a harmonious family.

Grower's Pride Narcissus Mix

M²
80

25-
45

3-4-5

Very good mix with narcissi in all shapes and sizes.
A guarantee for a very long flowering period.

GENERAL CONDITIONS of sales and deliveries of CSW LANDSCAPING BV. Leidsestraat 100, 2182 DR Hillegom Holland

1. Applicability

- 1.1. These terms and conditions only apply to agreements with regard to which one of the parties is a member of Anthos at the time of conclusion of the agreement, which – within the framework of these general terms and conditions – is also deemed to include other partnerships who are (in)directly affiliated to an Anthos member company.
- 1.2. All offers made by the seller and all contracts of sale entered into with the seller and the execution of such contracts of sale are governed by these conditions.
- 1.3. The applicability of general conditions of the buyer is expressly rejected by the seller.
- 1.4. Departures from the present conditions will only be valid if expressly agreed to in writing by the seller.
- 1.5. Insofar as these general terms and conditions are also drawn up in a language other than Dutch, in the event of any conflict the Dutch text shall always prevail.

2. Offers and conclusion of agreement

- 2.1. All offers and prices stated by the seller are free of obligations.
- 2.2. An agreement shall only come into effect once the seller has confirmed the order in writing.
- 2.3. Any supplementary arrangements or amendments agreed on at a later stage, as well as any verbal promises made by the seller's personnel or on behalf of the seller by agents or other parties working for the seller, will only be binding for the seller from the moment that the latter confirms them in writing.

3. Prices

- 3.1. All product prices are stated in Euro, are based on FOB, The Netherlands. Excluding PQ inspection cost.
- 3.2. If one or more of the cost price factors is subject to change after order confirmation but before delivery of the products, the seller shall be entitled to adjust the agreed prices accordingly.
- 3.3. The costs of transport, insurance and the inspections carried out by the Department of Phytopathology are payable by the buyer. All levies and/or taxes that are owed or become due, either directly or indirectly, on account of the agreement entered into between the seller and the buyer are payable exclusively and entirely by the buyer and may not be deducted from sums owed to the seller. For the cost of a Phytosanitary certificate we charge Euro 125,- per shipment. For the miscellaneous bulbs and Specie Tulips prices are mentioned by quantities purchased. For Hyacinths and Hippeastrum prices for quantities less than 5 boxes, per variety and per size, will be increased by 10 pct. Minimum order value must be Euro 2.000,- per shipment, otherwise terms will change from FOB into ex-warehouse.

4. Payment

- 4.1. Unless otherwise agreed in writing, payment for goods sold by the seller that are sent by air must be made within 30 days of the invoice date and, in the case of goods sent as sea freight, within 60 days of the invoice date in the agreed currency.
- 4.2. The value date on which the seller receives payment shall be deemed to constitute the date of payment. Where payment is made by means of a bank transfer, the date on which the seller's bank account is credited, shall be deemed to constitute the date of payment.
- 4.3. The buyer is not entitled to make any deduction, suspension or reduced payment and all calls for settlement are explicitly excluded. In the event of late payment, the seller will be entitled to charge the statutory interest for business transactions as of the due date, and also to charge any legal and extrajudicial costs incurred in collecting the amounts owed; the extrajudicial costs owed will never be less than 15% of the sum to be collected.

- 4.4. In case a delivery is effected in parts, the seller shall be entitled to demand payment for each partial delivery before proceeding with any other.

- 4.5. Upon or after entering into the agreement and before its implementation, the seller will be entitled to demand a guarantee from the buyer that both the payment obligations and any other obligations arising from this agreement will be fulfilled. Refusal by the buyer to provide the required security gives the seller the right to suspend its obligations and ultimately, without any notice of default or legal intervention, the right to dissolve the contract wholly or partially, without prejudice to his right to compensation for any damages suffered by him.

5. Delivery

- 5.1. All deliveries shall be FOB, The Netherlands, unless otherwise agreed in writing.
- 5.2. Although the stated time of delivery will always be taken into account as far as possible, this delivery time is approximately indicated and can never be considered a fatal date. The seller shall not be in default in respect of such delivery time until the buyer notifies it in writing that it is in default, in doing so stipulates a reasonable period of time within which the seller has the opportunity to effect delivery, and the latter still fails to do so.
- 5.3. The agreed delivery time shall commence as soon as the seller has confirmed the order in writing.
- 5.4. The seller shall not be liable for any harm due to late delivery if and insofar as this is attributable to circumstances beyond seller's control and sphere of risk, which is deemed to include late or non-compliance on the part of its suppliers.
- 5.5. The buyer's failure to comply with his duty to effect payment (or to do so on time), shall have the effect of suspending seller's duty to effect a delivery.

6. Force majeure

- 6.1. In a case of force majeure - for example in the event of a crop failure, viruses, natural disaster, labour strike, fire, or import and export problems - or in the case of other circumstances that make it impossible to demand the seller's fulfilment or timely fulfilment of the obligations arising from this agreement, the seller will be entitled to make a choice, without the need for legal intervention and without being obliged to pay any form of compensation, between completely or partially cancelling the agreement by means of a single written notice to that effect or the suspension of this agreement until the case of force majeure has come to an end.
- 6.2. Where the seller has already executed part of an agreement, the buyer shall pay the purchase price for any products that have been delivered.

7. Complaints

- 7.1. The buyer is obliged to check the products upon delivery for any visible and/or immediately observable defects. This means all defects that can be ascertained by means of ordinary sensory perception or a simple spot check. The buyer is moreover obliged to check whether the delivered products are also in accordance with other particulars of the order. Failure to fulfil the obligation to check the delivery shall mean the forfeiture of any claims the buyer may have vis-à-vis the seller.
- 7.2. If a delivery deviates less than 10% in terms of number, quantity and weight from that which was agreed, the buyer shall be obliged to accept the delivery in spite of such deviation.
- 7.3. Complaints regarding the quality and quantity of the products delivered must be submitted by registered mail or e-mail at the latest within seven calendar days after delivery at the port of arrival. Defects which can only be observed at a later stage (non visible defects) shall be forthwith reported to the seller after this has been observed. Once these periods have passed, the buyer will be considered to have approved the products supplied and complaints will no longer be considered.

7.4	The complaint must contain a description of the flaw and the seller must upon first request be given the opportunity to investigate the complaint. The buyer shall allow the seller to have the concerned products examined by an expert or an independent inspection service. If the complaint turns out to be well-founded, all the costs of any investigation will be for the seller's account. If a complaint is groundless, all the costs will be for the buyer's account.
7.5	If the buyer has reported a complaint to the seller in a timely manner and the seller has acknowledged this complaint, the seller shall only be obliged to deliver that which is missing, replace the delivered products or repay a proportional part of the purchase price, such as the seller's own discretion.
7.6	A complaint shall not suspend the buyer's payment obligation, unless the seller agrees expressly with such suspension.
7.7	The products can only be returned for the account and risk of the buyer and only after prior written permission has been obtained from the seller.
8.	Liability
8.1	The seller will never be liable for the results regarding the flowering of the products supplied. It always remains buyer's responsibility to assess if the circumstances, among which the climatological, are fit for the products.
8.2	In case of a shortcoming attributable to seller, seller's liability is always limited to a maximum of the net invoice value of the products or to that part of the net invoice value to which a claim for compensation is directly or indirectly related.
8.3	Except in the case of legal liability pursuant to provisions of mandatory law and a deliberate act or omission, or gross negligence, any liability of seller for any further damage, among which any direct or indirect damage, consequential damages or lost profits, is excluded.
8.4	The buyer shall indemnify the seller against all claims for compensation brought by third parties in respect of which the seller is not liable under these terms and conditions.
9.	Cancellation
9.1	The seller will be entitled to cancel an order if the buyer has failed to comply with earlier payment obligations with respect to the seller or with respect to other creditors. This right may also be exercised if the seller considers the information concerning the buyer's credit rating to be insufficient. The buyer will never be able to derive any rights from such cancellations or hold the seller liable.
9.2	The seller will only be required to accept the buyer's complete or partial cancellation of the agreement, as a result of any cause whatsoever, if the goods have not yet been delivered to the transporter for despatch and on condition that the customer pays compensation equivalent to at least 25% of the invoice value of the cancelled goods. The seller shall in that case also be entitled to charge all costs incurred up to that time.
9.3	The buyer is obliged to accept the products at the time that they are made available to him. If the buyer refuses to accept the goods, the seller will be entitled to sell them elsewhere and the buyer will be liable for the difference in price as well as all the other costs incurred by the seller in connection with this, among which costs of storage.
10.	Retention of title
10.1	The ownership of the goods supplied by the seller does not pass to the buyer until the sums invoiced, plus any interest, penalty and costs, as well as all claims as a result of the buyer's failure to perform its obligations towards the seller under this agreement or any other, have been paid in full. The provision of a cheque or any other bill of exchange will not count as payment in this regard.
10.2	The seller will be entitled to immediately take back the goods supplied if the buyer remains in default in any way whatsoever with regard to the fulfilment of payment obligations. In that case, the buyer will be obliged to allow the seller access to the buyer's land and buildings for this purpose.

10.3	The buyer must store the goods subject to a retention of title separately from the other goods, in order to be able to continue distinguishing the goods of the seller.
10.4	As long as the delivered goods are subject to a retention of title, the buyer may not sell, encumber or pledge these goods, or otherwise place them under the control of third parties, other than as part of its normal business operations. The buyer shall, however, not be permitted to sell the goods within the context of its normal business operations if it has applied for a suspension of payments or if it has been declared bankrupt.
11.	Suspension and dissolution
11.1	If the buyer fails to perform, fails to perform in a timely manner, or fails to perform to a sufficient degree any of the obligations arising for it from the concluded agreement, or if a well-founded fear exists of such failure occurring, as well as in the case of an application for a suspension of payments order, bankruptcy or the liquidation of any of the buyer's businesses, as well as in the event of the buyer's death, or dissolution if the buyer is a company, or if there is any change in the type of company or in its management or in the contribution made by the company's activities, the seller will be entitled, without notice of default or legal intervention being required, to suspend its own obligations for a reasonable period or to annul the agreement without being held liable for any compensation.
11.2	The claim of the seller with respect to the part of the agreement already performed, as well as damage arising from the suspension or termination, which damage includes lost profit, shall be immediately due and payable.
12.	Intellectual property rights
12.1	The seller reserves all rights which it has in relation to intellectual property rights in respect of products it has supplied.
12.2	With regard to cases in which it is apparent from the seller's catalogue or from the agreement entered into by the parties that a variety is protected by plant breeder's rights - which is indicated by a letter R or P after the name of the variety concerned - the buyer will be bound to fulfil all the obligations the said rights entail. Any failure to comply with this stipulation will result in the buyer being liable for the losses incurred by the seller or any third party.
13.	Severance
	Should any provision of these general terms and conditions of sale and delivery be non-applicable or in conflict with public order or the law, only the provision in question shall be deemed as not having been written and the rest of the conditions shall remain fully in force. The seller reserves the right to amend the inadmissible provision in order to make it legally valid.
14.	Jurisdiction, forum
14.1	Any disputes, even if only considered as such by one of the parties, will be put before the competent court in the district in which the seller is registered, without affecting the right of the seller to have the dispute heard by another competent court.
14.2	All offers and agreements concluded between the buyer and the seller shall be exclusively governed by the laws of the Netherlands.
